Incident Management

The Gillette Community College District is committed to developing and maintaining a comprehensive emergency management and operations program. The program will address the mission critical areas of preparedness, response, recovery, prevention, and mitigation. As part of this program, the District will ensure that our Incident Management Plan (IMP) is practiced through collaboration, training, and exercises.

This policy and the subsequent plan have been developed through supported content from the Federal Emergency Management Association (FEMA), the Department of Homeland Security (DHS), and the Department of Education (ED) and will be reviewed annually at a minimum.
